Welcome to the new ASX Online - Information Services site

These pages replace the previous Market Information pages which have been refreshed. This is an extranet service providing access to a broad range of subscription based ASX data products such as issuer and security fundamental data, reference data, company announcements and other listed company information products. Further information on these products is available on this site. Enquires about product subscriptions should be directed to Information.Services@asx.com.au.

This site also provides free access to product documentation such as specification manuals, product overviews and access to the ASX Information Services Policy Guidelines for details of permitted use of data across the entire Information Services product suite.

Forgotten your password

To request a password reset, please enter your User ID and email address and press the Reset Password button. Your password reset instructions will then be emailed to that address.

User ID:

Email Address:

Enter your User ID and the email address that is linked to your User ID, then click the "Reset Password" button

You will be shown a screen with a confirmation message and an email should arrive at the email address which you provided.

The email will contain a link which once you click it you will be taken to a page on the ASX Online – Information Services site where you can change your password.

Note that the link (URL) is valid for 30 minutes only. After 30 minutes the link will become invalid and you will need to repeat the above step to generate a new link should you still need to reset your password.

Forgotten your password

An email containing your password reset instructions has been sent to your email address, and should arrive shortly.

You may now navigate back to the login screen by clicking [here](#)

User Profile - [Authentication Token]

Authentication Tokens are only required if you wish to download your product files via the Java Downloader application or programmatically via a RESTful API.

When a token has not yet been generated you will see a page like this :

The screenshot shows the ASX user profile page. At the top left is the ASX logo. To the right is a navigation menu with links for Home, Log Out, User Profile, Subscribed Products, Product Information, and FAQ. The main heading is "Authentication Token". On the left is a sidebar menu with links for User Details, Change Password, Email Notification, Your Postal Address, Billing Address, Subscription Details, and Subscription Authentication. The main content area contains a message: "You currently do not have any authentication tokens generated, please use the form below to generate one." Below this is a grey box with the text: "Click the button below to issue a new access token, if you already have an active token it will be invalid once new one is generated." A blue button labeled "Re-Generate Access Token" is present. A red callout box with an arrow pointing to the button contains the text: "Click to generate an authentication token. Authentication tokens are required when you wish to download your product files via the Java Downloader OR programmatically via a RESTful API." At the bottom of the page is a footer with links for Terms and Conditions, Privacy Statement, Privacy Collection Statement, and asx.com.au, along with the copyright notice: © ASX Limited ABN 98 008 624 691.

If you click the “Re-Generate Access Token” button you will first be asked to confirm. This safety measure gives you an opt-out in case you accidentally clicked the button.

NOTE: Once a new token is generated, any existing token is automatically expired. You will need to update your Java Downloader configuration to use the newly generated token as you will not be able to use the expired token to download files via the Java Downloader.

WARNING : Are you sure you want to regenerate access token?
