1. Purpose

The purpose of this document is to provide guidance for participants and vendors when testing functionality in their systems for the new Australian Morning and Evening Peak Load Electricity Futures Contracts (Peak Futures Contracts).

2. Pre-requisite or dependencies

Participants should ensure the following are complete prior to trading.

Pre-requisites or dependencies
Set Pre-Trade Risk limits (PTRM) in ASX 24 Admin and Risk Terminal (ART)
Trading Protection Limits (TPL) configuration optional but strongly encouraged
Contract codes reflect what is outlined in table 1

3. Out of scope

Out of scope items
ASX will not offer listed spreads on ASX 24 against other listed Peak Futures products. However, spreads can be traded via the User Defined Combination (UDC) functionality.

4. Contract set up

Contract set up
The new morning and evening Peak Futures Contracts will be listed alongside the existing Peak Futures Contracts with Open Interest expiring naturally in the existing contracts where Open Interest is established (PN and PV).
The first contract listed for trading in production will be the Q3 2025 contract (September 2025 expiry). All full list of contract codes by quarter are displayed in table 1.
Vendors are advised that the contract codes listed in table 1 should match those displayed in their systems.
Due to the number of new contracts to be listed, the listing will be implemented in a phased approach over a number of weeks. Details of the listing approach will be provided in due course.
