

ETO Market Maker Scheme

November 2025

Role of ETO Market Makers

Market Makers play an important role in the ASX options market. Market Makers compete against one another while trading on their own accounts and at their own risk. Under contractual arrangements with ASX, they are incentivised to achieve benchmark quoting requirements.

The quoting requirements are to ensure liquidity in the market, so that traders are more easily able to trade into and out of an options position and also so that other traders and investors are more easily able to price and value options positions.

Liquidity is assisted when there are multiple Market Makers covering each stock. ETO Market Makers are contracted into one or more Classes (representing each underlying security) in which they must meet ASX's volume and spread requirements with maturities going out to a minimum of one year. This involves quoting buy and sell prices for a certain number of series, and/or responding to quote requests from other Market Participants for prices.

Description of Quoting Requirements for Market Makers

For each option Class in which a Market Maker is responsible there are three quoting benchmark requirements. Market Makers are judged on their performance in making markets in certain series on a Continuous Basis and on making markets in response to Quote Requests in certain series.

- Minimum of 50% on the required Continuous Quoting benchmark;
- Minimum of 50% on the required Quote Request Quoting benchmark; and
- A combined minimum average of 70% on Continuous Quoting and Quote Request Quoting

Continuous Quoting Benchmark

Monthly Contracts: A market maker is required to provide continuous quoting as per the below.

Top 20 ETO Class:

- 1) For American style single stock options, a market maker can choose between 3 different minimum benchmarks:
 - a. 48 option series per class (comprising 8 calls and 8 puts in any 3 of the first 6 expiration months
 - b. 96 series (comprising 12 calls and 12 puts) in in any 4 of the first 7 expiry months.
 - c. 156 series (comprising 13 calls and 13 puts) in any 6 of the first 8 expiry months.
- 2) For European style single stock options, a market maker has the option to take up the following obligation:
 - a. 36 option series per class (comprising 6 calls and 6 puts in any 3 of the first 6 expiration months.

20+ ETO Class:

- 1) For American style single stock options, a market maker can choose between 3 different minimum benchmarks:
 - a. 24 option series per class (comprising 4 calls and 4 puts) in any 3 of the first 6 expiration months.
 - b. 36 option series per class (comprising 6 calls and 6 puts) in any 3 of the first 6 expiration months.
 - c. 72 series (comprising 9 calls and 9 puts) in in any 4 of the first 7 expiry months.
- 2) For European style single stock options, a market maker has the option to take up the following obligation:
 - a. 24 option series per class (comprising 4 calls and 4 puts in any 3 of the first 6 expiration months

Each order must be for at least the minimum quantity, and at or within the designated maximum spread requirements.

Weekly Contracts: A market maker is required to provide continuous orders in 24 American style series encompassing 6 calls and 6 puts in at least two weekly expiries. Each order must be for at least the minimum quantity, and at or within the designated maximum spread requirements.

Quote Request Quoting Benchmark

The market maker is required to provide orders on request for all series up to a minimum of twelve months expiration in the minimum quantity and at or within the maximum spread.

Minimum Contracts

Each security (Class) over which exchange traded options is listed whereby MMs have been contracted to meet obligations has been allocated a minimum number of contracts to quote designated by ASX. The number of contracts set by ASX takes into account the underlying security's liquidity and volatility whilst also considering the historic trading volumes of options for that given security. ASX will at times also consult with participants (generally Market Makers) in determining the appropriate level to be set.

Quoting Requirement Notes

Investors in ASX ETOs should be aware of the following:

- Market Maker monitoring (as to the Market Maker's quoting performance against the benchmark requirements) is calculated over the course of a calendar month not daily.
- Market Maker monitoring (as to the Market Maker's performance against the benchmark requirements) times are: 10.00am – 4.00pm for single stock options; and 9.50am – 4.30pm for index options.
- Market Makers are not required to provide quotes in all series, or at all times, and as such there can be no guarantee that all series will have prices displayed. The ability of Market Makers to provide quotes can be impacted at times by a variety of factors including, company announcements, company corporate actions, liquidity in the underlying and its options, price volatility in the underlying and its options and trading system limitations. While these events may occur infrequently traders and investors should have a contingency plan to deal with an absence of quotes.
